- 1 1. A method comprising:
- 2 providing a graphical user interface indicating a
- 3 season premiere episode of a season series of television
- 4 programs; and
- in response to the selection of the episode
- 6 through said interface, automatically recording the season
- 7 series.
- 1 2. The method of claim 1 wherein providing a
- 2 graphical user interface includes providing an electronic
- 3 programming guide.
- 1 3. The method of claim 2 including providing a
- 2 graphical user interface that displays a plurality of
- 3 upcoming season premiere episodes.
- 1 4. The method of claim 1 including enabling the user
- 2 to select the episode to automatically tune to all of the
- 3 programs in the season series.
- 1 5. The method of claim 1 including storing
- 2 information about the season series in a database.
- 1 6. The method of claim 1 including acquiring
- 2 information about the season series over the Internet.

- 7. The method of claim 6 including, in response to the selection of the episode, automatically acquiring a schedule for said season series over the Internet.
- 8. An article comprising a medium storing 1 2 instructions that enable a processor-based system to: provide a graphical user interface indicating a 3 season premiere episode of a season series of television 4 5 programs; and 6 in response to the selection of the episode 7 through said interface, automatically record the season series. 8
- 9. The article of claim 8 further storing instructions that enable the processor-based system to provide an electronic programming guide.
- 1 10. The article of claim 9 further storing 2 instructions that enable the processor-based system to 3 provide a graphical user interface that displays a 4 plurality of upcoming season premiere episodes.
- 1 11. The article of claim 8 further storing 2 instructions that enable the processor-based system to 3 automatically tune to all of the programs in the season 4 series.

- 1 12. The article of claim 8 further storing 2 instructions that enable the processor-based system to 3 obtain information about a season series from a database.
- 1 13. The article of claim 8 further storing 2 instructions that enable the processor-based system to 3 acquire information about a season series over the 4 Internet.
- 1 14. The article of claim 13 further storing
 2 instructions that enable the processor-based system to
 3 automatically acquire a schedule of said season series over
 4 the Internet.
 - 15. A system comprising:
 - a processor;
 - a storage coupled to said processor, said storage storing instructions that enable said processor to generate a graphical user interface indicating a season premiere episode of a season series of television programs and, in response to the selection of the episode through said interface, automatically record the season series.

- 1 16. The system of claim 15 wherein said storage 2 further stores instructions that enable the processor to 3 generate an electronic programming guide.
- 1 17. The system of claim 15 including an interface 2 coupled to said processor for wireless communications, said 3 system further including a remote control unit that 4 communicates with said interface.
- 1 18. The system of claim 15 wherein said storage 2 further stores instructions that enable the processor to 3 generate a graphical user interface that displays a 4 plurality of upcoming season premiere episodes.
 - 19. The system of claim 15 wherein said storage further stores instructions that enable the processor to automatically tune to all of the programs in the season series.
- 20. The system of claim 15 wherein said storage further stores instructions that enable the processor to automatically acquire information about the season series over the Internet.
